

PUBLICATIONS (selected - last \approx 10 years):

Dahle, H., Nilsen, B., Blikra, L.H. & Braathen, A. (2005): "Numerical study of stability of stability for the Oppstadhornet rock-slope failure". Proc. ICFL 2005 Norway, September 2005, 83-88.

Nilsen, B. (2005): "The significance of groundwater pressure estimation in rock slope stability analysis". Proc. Int. Conf. on Landslide Risk Management, Vancouver May 2005, 6p (CD).

Grøneng, G., Nilsen, B., Blikra, L.H. & Braathen, A. (2005): "The significance of climate on deformation in a rock-slope failure - the Åkerneset case study from Norway". Proc. Int. Conf. on Landslide Risk Management, Vancouver May 2005, 725-729.

Panthi, K. & Nilsen, B. (2005): "Comparison between predicted and actual rock mass conditions: a review based on tunnel projects in Nepal Himalaya". Proc. Int. Conf. Hydropower'05, Stavanger May 2005, 10p (CD).

Panthi, K. & Nilsen, B. (2005): "Significance of grouting for controlling leakage in water tunnels - a case from Nepal". Proc. 31st ITA-AITES World Tunnel Congress, Istanbul May 2005, 2:931-937.

Blindheim OT, Grøv E & Nilsen B (2005): "Nordic sub sea tunnel projects". Proc. 31th ITA World Tunnel Congress, Istanbul April 2005, In: Tunnelling and Underground Space Technology, 20:570-580.

Holmøy, K.H. & Nilsen, B. (2004): "Site investigation results versus tunnelling conditions - a study with emphasis on water leakage based on Norwegian cases". Proc. 30th ITA World Tunnel Congress, Singapore May 2004, Vol. 2:1327-1335.

Pathak, S. & Nilsen, B. (2004): "Probabilistic rock slope stability analysis for Himalayan condition". IAEG Bulletin of Engineering Geology and the Environment, Springer, 63:25-32.

Pathak S & Nilsen B (2003): "Probabilistic approach in rock slope stability analysis for Himalayan conditions". Proc. 10th Congr. of the ISRM: "Technology Roadmap for Rock Mechanics", Johannesburg September 2003, South African Institute of Mining and Metallurgy, Vol. 2, 887-892.

Kassana LK & Nilsen B (2003): "Analysis of water leakages at Lower Kihansi hydropower plant system". Proc. Int. Conf. Waterpower XIII, Buffalo July 2003, HCI Publ., 170:1-170:12.

Nilsen B (2003): "Investigation and testing for Norwegian hard rock TBM performance prediction". Proc. 50th years Symp. of the Faculty of Mines, Istanbul Technical University (ITU), Istanbul June 2003, ITU, 6p.

Nilsen B, Shrestha GL, Panthi KK, Holmøy KH & Olsen V (2003): "RMR vs Q vs RMI". Tunnels & Tunnelling Int., 35:5, 45-48.

Nilsen B & Palmstrøm A (2003): "Optimum extent of investigations for underground excavations". NFR Research Project "Tunnels for the citizen". Norwegian Public Roads Administration, Technology Division, Publ. No. 101, 132 p.

Nilsen B (2003): "Review of relevant investigation methods". Proc. Norwegian Nat. Conf. "Investigations for rock excavations" / Kursdagene ved NTNU", Trondheim January 2003, 3.1-3.15 (in Norwegian).

Steingrímsson JH., Grøv E & Nilsen B (2002): "The significance of mixed-face conditions for TBM performance". World Tunnelling, 9:435-441.

Blindheim OT, Grøv E & Nilsen B (2002): "The effect of mixed-face conditions on hard rock TBM performance". Proc. 28th ITA World Tunnel Congress, Sydney March 2002, Inst. of Engineers Australia, 887-893.

Blindheim OT & Nilsen B (2001): "Rock cover requirements for subsea road tunnels". Proc. 4th Int. Symp. on Strait Crossings, Bergen September 2001, Balkema, 439-448.

- Nilsen B & Palmstrøm A (2001): "Stability and water leakage of hard rock subsea tunnels". Proc. Int. Conf. "IS-Kyoto 2001. Modern Tunnelling Science and Technology", Kyoto October/November 2001, Balkema, 497-502.
- Gertsch L, Fjeld A, Nilsen B & Gertsch R (2000): "Use of TBM muck as construction material". Tunnelling and Underground Space Technology, Pergamon, 15:379-402.
- Nilsen B (2000): "Alternative approaches of rock slope stability analysis". Proc. Int. Conf. GeoEng2000, Melbourne, Australia, November 2000, ISRM/IAEG/ISSMGE, 7 p.
- Nilsen B (2000): "Norwegian hard rock TBM performance prediction". North American Tunnelling 2000 - Mechanical Excavation, Raise Boring and Shaft Drilling Short Course. Boston, June 2000. AUA/Colorado School of Mines, 6 p.
- Nilsen B & Palmstrøm A (2000): "Engineering geology and rock engineering". Norwegian Group for Rock Mechanics (NBG), Handbook No. 2, 260 p.
- Nilsen B (2000): "New trends in rock slope stability analyses". IAEG Bulletin of Engineering Geology and the Environment, Springer, 58:173-178
- Palmstrøm A, Stille H & Nilsen B (2000): "The Frøya tunnel - a sub-sea road tunnel in complex ground conditions". Proc. Swedish Rock Mechanics Conference, Stockholm, March 2000, SveBeFo, 19-30.
- Nilsen B (2000): "Norwegian subsea rock tunnels - a review of rock engineering characteristics". Proc. 5th South American Congress on Rock Mechanics, Santos, Brazil, November 1998, ISRM/EPUSP, Sao Paulo, Vol.2, 15 p.
- Nilsen B (1999): "Alternative approaches for stability analysis". Proc. Annual Nat. Norwegian Conf. on Rock Engineering, Oslo 1999, 33.1-33.15 (in Norwegian).
- Nilsen B, Palmstrøm A and Stille H. (1999): "Quality control of subsea tunnel project in complex ground conditions". Proc. ITA World Tunnel Congress, Oslo May-June 1999, Balkema, 137-145.
- Nilsen B (1999): "Key factors determining stability and water leakage of hard rock subsea tunnels". Proc. Vail Rocks '99, June 1999, Balkema, vol. 2, 593-599.
- Ozdemir L & Nilsen B (1999): "Recommended laboratory rock testing for TBM projects". AUA Journal, June 1999, 21-35.
- Nilsen B & Ozdemir L (1999): "Recent developments in site investigation and testing for hard rock TBM projects". Proc. 1999 RETC Conference, Orlando, June 1999, SME, 715-731.
- Nilsen B (1998): "Subsea rock tunnels - some Norwegian experiences in geo-investigation and construction". Proc. 5th South American Congress on Rock Mechanics, Santos, Brazil, November 1998, ISRM/EPUSP, Sao Paulo, 327-331.
- Nilsen B (1997): "Cases of unexpected ground conditions - how much are they related to insufficient geological investigations?". Proc. Annual Nat. Norwegian Conf. on Rock Engineering, Oslo 1997, 5.1-5.10 (in Norwegian).
- Bruland A, Dahlø TS & Nilsen B (1997): "Development of new miniature drillability tests for performance prediction". Proc. 4th Int. Symp. on Mine Mechanization and Automation, Brisbane, July 1997, Vol. 2, A5.59-66.
- Kim M, Broch E & Nilsen B (1997): "Technical analysis on the cost-saving in Norwegian rock excavation". Proc. 1st Asian Rock Mech. Symp. on Environmental and safety concerns in underground construction, Seoul, October 1997, Balkema, 227-232.
- Rostami J, Ozdemir L & Nilsen B (1996): "Comparison between CSM and NTH hard rock TBM performance prediction models". Proc. Annual Conf. of the Institution of Shaft Drilling Technology, Las

Vegas, May 1996, 11 p.

Nilsen B (1995): "Rock Slope Stability - is there a big difference between Sichuan and Norway?". Proc. Annual Nat. Norwegian Conf. on Rock Engineering, Oslo 1995, 29.1-29.9 (in Norwegian).

Bruland A, Dahlø TS & Nilsen B (1995): "Tunneling Performance Estimation Based on Drillability Testing". Proc. 8th ISRM Congress, Tokyo, September 1995, 123- 126.
